

The JVA Z Range Energizer

The JVA Range of Energizers has been collaboratively designed and manufactured by an international team with over 30 years of electric fence experience earned in some of the most testing security environments in the world.

It aims to provide the very best low-cost, high-voltage security energizers in the world. They are compact, integrated and fully programmable electric fence energizers with built-in alarm units and LCD out and return voltage display. They also have the option of being controlled from a remote LCD keypad.

State-of-the-art energizer design
IP4 x and ABS plastic

Unique LCD display depicting fence out and return voltage

Unique LCD keypad option depicting fence and alarm condition

Wall-mounted, robust energizer housing with easily detachable PCB chassis for ease of installation and repair
